

EPOSTERS SSAI 2022

Thursday Lunch

Topics: Intensive Care & Prehospital Care

Abs.-No.	Title	Presenting Author	Monitor	Chair
A-110	High ICU-nurse turnover is associated with longer time parameters in ICU after cardiac surgery	Kann	M1	Flaatten H
A-112	Consistency in pulmonary artery catheter monitoring after heart transplantation and the missed detection of graft dysfunction	Jan	M1	Flaatten H
A-135	Fibrinolysis in patients treated with hypothermia after cardiac arrest	Jeppesen	M1	Flaatten H
A-197	Continuous monitoring of vital sign abnormalities; association to clinical complications in 500 postoperative patients	Haahr-Raunkjaer	M1	Flaatten H
A-201	Withdrawal of life sustaining treatment on the ICU – a survey of doctors’ practices in Sweden	Cronhjort	M1	Flaatten H
A-179	Thrombocytopenia during first 24 hours of intensive care admission leads to increased risk of long-term mortality in patients with traumatic brain injury: A Finnish Intensive Care Consortium study	Lillemäe	M2	Møller K
A-199	Who gets Early Multidisciplinary Rehabilitation in Neuro-Intensive Care Unit?	Alvsåker	M2	Møller K
A-210	Reductions in cardiac stroke volume are associated with reductions in cerebral blood flow in healthy subjects despite maintained arterial blood pressure	Skytjoti	M2	Møller K
A-215	Wavelet analysis to quantify cerebral autoregulation during rapid arterial blood pressure oscillations	Skytjoti	M2	Møller K
A-219	Utilization and outcomes of tracheostomies in the intensive care unit in Iceland in 2007-2020: a descriptive study	Kristinsdottir	M2	Møller K
A-106	Which factors influence refusal of admission to intensive care?	Smith	M3	Åneman A
A-116	Characteristics of preeclampsia patients needing intensive care in Sweden	Edvinsson	M3	Åneman A
A-138	Multiplate in preeclamptic women-an observational study	Bengtsson	M3	Åneman A
A-182	Significance of Pediatric Risk Score of Mortality in the assessment of multiple organ dysfunction syndrome outcomes	Tatic	M3	Åneman A
A-240	The impact of chronic complex conditions on PICU mortality - a registry-based study.	Daham	M3	Åneman A

A-194	comparison of positive pressure extubation with traditional extubation in critically ill patients- a randomised control study	Darlong	M4	Lindholm E
A-216	Comparison of five different thermometry devices used during laparoscopic surgery and intensive care treatment: An observational study	Lindholm	M4	Lindholm E
A-229	Local postoperative graft inflammation is increased in pancreas transplanted patients with early graft thrombosis	Rydenfelt	M4	Lindholm E
A-238	The use of Doppler ultrasound and pulse oximetry to detect flow in a marginally circulated reimplanted tongue following a traumatic amputation.	Helskog	M4	Lindholm E
A-250	Using a porcine ex-vivo ischemia model in assessment of human intestinal ischemia.	Hødnebo	M4	Lindholm E
A-127	Fear of making a mistake - largest cause of stress for staff in Covid19 ICU's	Escher	M5	Rasmussen B
A-227	Stress reactions and health problems in hospital personnel during the Covid-19 pandemic,- a longitudinal, multicenter study	Wøien	M5	Rasmussen B
A-237	Maternal outcome of pregnant and postpartum women admitted to intensive care unit due to COVID-19 infection: A retrospective study	Sotka-Rantala	M5	Rasmussen B
A-254	Association of apolipoprotein E4 to the number of cerebral microbleeds in patients recovered from COVID-19	Hästbacka	M5	Rasmussen B
A-256	Vital sign deviations in hospitalized patients with COVID-19: an observational study with continuous monitoring	Grønbæk	M5	Rasmussen B
A-117	Danish prehospital physicians: Highly skilled professionals on a spare time job.	Hansen	M6	Skogvoll E
A-120	Communication in a sudden-onset major incident. Quantification and solutions	Hansen	M6	Skogvoll E
A-147	Main symptoms and functional impairments for first aid providers following first aid incidents	Øvstebø	M6	Skogvoll E
A-173	Venous air embolism triggers a complement C3-dependent thromboinflammation.	Storm	M6	Skogvoll E
A-226	The first response unit's impact on the prehospital on-scene time among stroke suspected patients	Vaajanen	M6	Skogvoll E
A-257	Different methods for administration of tranexamic acid during haemorrhagic shock in a swine model	Lynghaug	M6	Skogvoll E
A-118	Ten-year trends of adult trauma patients in Central Denmark Region from 2010 to 2019	Kirkegaard	M7	Sollid S
A-206	The kinetics of endogenous thrombin generation during the first 24 hours after trauma: A prospective observational study	Rognes	M7	Sollid S

A-225	Nurse-led ultrasound-guided femoral nerve block: a randomized controlled trial of task shifting in an emergency department	Saga	M7	Sollid S
A-233	A Parametric Model for Return of Spontaneous Circulation after Pulseless Electric Activity during In-hospital Cardiac Arrest	Unneland	M7	Sollid S
A-241	Functional follow-up in potentially severely injured patients: feasibility, outcome and experiences	Olsen	M7	Sollid S
A-248	Prevalence and degree of on-admission hypothermia in patients with moderate and severe traumatic brain injury	Eidstuen	M7	Sollid S
